ABOUT

High energy, data-driven problem solver, looking forward to a rewarding vocational experience with an exceptional organization. My objective is to add value by coupling time-honored personal principles (accountability, mindfulness, discipline, & integrity) with modern web development skills.

EXPERIENCE

General Assembly, Washington, D.C.

Web Development Immersive, January-April 2017

- Rigorous coursework included 500+ hours of formal classroom instruction, experiential labs, individual & group projects, daily homework assignments, and weekly "checkpoints" (quizzes) in the disciplines of front-end and back-end software/web development.
- Completed additional evening & weekend workshops pertaining to the disciplines of "Product Management", "Data Science", "UX Design", and "Digital Marketing."
- Maintained "perfect attendance" record during my GA cohort. This is the same level of accountability & commitment I intend to bring to my hiring organization.

TheBigPicture, Washington, D.C.

Product Manager, June 2015 - Dec 2016

- Implemented innovative diet-&-lifestyle-related Chronic Disease Management & Prevention system.
- Conducted comprehensive healthcare market research.
- Managed IOS & Android app deployment.
- Oversaw FDA guideline adherence.
- Developed social media marketing strategy.

Comcast, Washington, D.C.

Account Executive, Nov 2013 - June 2015

- Met with potential clients to identify technology gaps & needs; and fulfilled said gaps/needs with corresponding products & services.
- Arranged for product/service delivery and/or installation.
- Followed up with clients to ensure products & services met/exceeded client expectation; and subsequently
 asked clients to provide referral business opportunities.

EDUCATION

General Assembly *Jan -April 2017* Web Development Immersive, Washington, D.C.

University of Maryland 2004 - 2007 Bachelors in Business Administration
